## DETAILED ACTION

1. Applicant's arguments and amendments filed 3/27/2007 have been fully considered. Claims 1-8 and 10-19 are pending. Claim 9 is canceled. Claims 1-5, 7, 10, 13, 15, 17, and 19 are amended. Claims 6, 8, 11-12, 14, 16, and 18 are original.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-8 and 10-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The applicant is urged to review Figs. 7-9 of the specification. The amended claim 1 states that "a second rotational body having a first end connected to the tub and a second end connected rotatably to a second end of the first rotational body". The connection to the tub would destroy the invention – the assembly works by means of a vibration transferring portion 76 which is struck by the tub 70, paragraph [0093], Figs. 7-9. While Fig. 4 shows that the second connection portion 140 and vibration transferring portion 70 obstruct each other when viewed from the side – the assembly is three-dimensional and Figs. 7-9 clearly dismisses this optical illusion. Note: the amended claims contained new matter – the claims containing the new matter appear to read over the prior art but applicant is

notified that removal of the new matter may result in the previous art rejections to be re-applied.

***Drawings***

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: "40" and "97". Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

5. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In the instant application, abstract exceeds the 150-word maximum.

***Response to Arguments***

6. Applicant's arguments with respect to claims 1-8 and 10-19 have been considered but are moot in view of the new ground(s) of rejection.
7. Applicant's amendments filed 3/27/2007 have been fully considered but they are not persuasive with regards to the objections to the specification (abstract) and the drawings (reference number labels not described in specification, Fig. 1. – "40" and Fig. 3. – "97". The applicant indicated that a revised specification had been included to overcome the objections; however, no amended specification was found by the examiner.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
